August 31, 2021

To Whom It May Concern:

Google is pleased to inform you that Utkarsh Mishra has successfully completed Google Summer of Code 2021, a program which connects students with mentors for 10 weeks to develop open source software. Each year many students apply to participate with only a portion of them being accepted into the program, and not every student finishes the program successfully.

Utkarsh was accepted into the program by, and developed open source software for, JdeRobot - Universidad Rey Juan Carlos beginning June 7, 2021 and ending on August 23, 2021. Over that period, they passed their two evaluations conducted by their mentor.

More information on Utkarsh's project can be found at:
https://summerofcode.withgoogle.com/projects/6419384047763456

Utkarsh worked from home on their project and was not required to visit either Google or JdeRobot - Universidad Rey Juan Carlos's offices. They received a stipend of 1500 USD for the project. Although Utkarsh was not directly employed by Google during Google Summer of Code 2021, the program was administered by Google from our corporate headquarters and Google acted as the host organization for the duration of Utkarsh's participation.

You can learn more about the program on our website at g.co/gsoc. Should you require any further information, please do not hesitate to contact our team via email at gsoc-support@google.com.

Best,

Stephanie Taylor
Google Summer of Code Program Lead
